

Profile

Computer Science undergraduate graduating in 2027 with hands-on experience in **AI/LLM applications, RAG pipelines, and backend development**. Skilled in Python, LangChain, embeddings, vector databases, and REST APIs.

Education

- **B.Tech in Computer Science Engineering, UPES, Dehradun - CGPA: 8.60**
 - **12th, CBSE, The Vivekanand School, Narela, Delhi - Percentage: 83.4%**
 - **10th, CBSE, D.A.V Public School , Kurukshetra, Haryana - Percentage: 95.6%**
- Aug 2023 – Present

Apr 2022 – Mar 2023

Apr 2020 – Mar 2021

Technical Skills

Languages: Python, Java, SQL
AI/LLM: LLMs, Generative AI, RAG, LangChain, Prompt Engineering, Embeddings, Semantic Search
Machine Learning: Scikit-Learn, XGBoost, Feature Engineering, Model Evaluation
Backend & APIs: FastAPI, REST APIs
Databases: MySQL
Tools & CS: GitHub, Data Structures, Algorithms, OOP, DBMS, Operating Systems

Experience

- AI Engineering Intern**

June 2026 – July 2026

Xebia *Remote*

 - Developed AI-enabled software solutions using **Python, REST APIs, and LLM workflows** for real-world automation use cases.
 - Built a **Smart City Traffic Optimization** solution integrating external APIs and backend workflows while collaborating with Agile teams to deliver reliable software.

Projects

- ResearchRAG – Citation-Aware Research Assistant** | Python, LangChain, ChromaDB, Groq, Streamlit

GitHub

 - Built a **RAG pipeline** using semantic chunking, BGE embeddings, and ChromaDB for multi-document research QA.
 - Implemented **dense retrieval and cross-encoder reranking** to improve context relevance and LLM response grounding.
 - Developed **citation-aware generation** with document/page attribution and evaluated retrieval quality using RAG metrics.
- Smart City Traffic Optimization System** | Python, Prompt Engineering, TomTom API, Streamlit, Figma

GitHub

 - Built an AI-enabled traffic platform using **Python and TomTom APIs** for real-time routing and traffic analysis.
 - Integrated external APIs with backend workflows to automate route recommendations and support **data-driven decisions**.
 - Designed an interactive **Streamlit application** for AI-assisted route optimization and practical end-user interaction.
- Hotel Management System** | Java, MySQL, JDBC

GitHub

 - Developed a modular **Java application** supporting booking, billing, authentication, and customer management.
 - Designed normalized **MySQL databases** and implemented CRUD operations using JDBC for reliable data management.
- Applied **OOP and modular design principles** to build maintainable application components and workflows.

Leadership

- Director of Photography**

Jan 2025 – Present

Cyber Sentinel, UPES *Dehradun*

 - Led cross-functional student teams, delegated responsibilities, and coordinated execution of technical events and workshops.
 - Managed project timelines and deliverables while collaborating with multiple stakeholders to ensure timely completion of media assets.
 - Strengthened communication and team coordination through structured planning, ownership, and collaborative execution.

Achievements

- Solved **200+ Data Structures, Algorithms, and SQL problems** on LeetCode, strengthening problem-solving and programming skills.
- Maintained a **CGPA of 8.60/10** while completing an AI Engineering internship and developing AI-focused software projects.
